

## Vén Zoltán

I was born on 14th of August 1941 in the horoscope mark of the lion – in Pestszenterzsébet - into a typical small civic family. Another important event in my life: the birth of Zsolt (1972) and Márton (1974), my sons. Neither before nor after anything worth mentioning has happened to me.

Attila Tibor Pátor one of my friend - amateur graphologist - described my character as following (which exist according to these words):

"It's hard to make a friendship with You, but when you open (sic!) You are able honestly to love. You wait for an influence by the other party, and then you decide to deny - or not! If you are hurt by someone, you will never forget! "

Iipse dixit! - That's about my spiritual world.

Material is more exciting!

Lymphocyte 26 is 58, the protuberantian occipital extern has a huge thorn-like exostosis. The lordosis of the spinal column disappeared (Ecce anticaricist). The Ulcus duodendum in the central bulb of the bulbus (on the high curve side) increased my tendency to irony. Even after my polipemic work I was able to disturb silence with my whispering voice!

More than that is just boasted!
